

## **Senior Air Quality Planner**

### **Planning Spec Adv – 1 Position (Nashville)**

The TDOT Long Range Planning Division is seeking a qualified professional with a transportation planning background and a strong interest in environment and air quality improvements. The senior air quality planner serves as a team leader coordinating the development and implementation of the Congestion Mitigation and Air Quality Improvement (CMAQ) and Transportation Demand Management (TDM) programs.

Senior Air Quality Planner duties include:

- Collecting, processing, and analyzing air quality-related data, demographic data, and other data as necessary.
- Developing maps, graphics, and illustrations for presentations and reports.
- Preparing written summaries of analysis and research for use at meetings and in reports.
- Facilitating and supporting statewide committees and other stakeholder meetings.

This position initiates and participates in regular collaborative congestion mitigation and air quality planning opportunities with the private sector, metropolitan planning organizations, cities, counties, and other state agencies.

Qualifications for this position include:

- Strong interest in environmental and/or air quality planning and transportation policies.
- Ability to work independently and in a team environment.
- Strong computer skills in areas such as ArcGIS software, data analysis, spreadsheet software, and word processing software.

Maintains a comprehensive, current knowledge of applicable policies, procedures, programs, codes, regulations and standards; conducts research and maintains an awareness of new issues, methods, equipment, trends and advances in the profession; reads professional literature to stay up to date with best practices; maintains professional affiliations; participates in continuing education activities; attends meetings, conferences, workshops and training sessions as appropriate.
