

TDOT Planning Manager

Data Management Planning Manager – 1 Position

Tennessee Department of Transportation is searching for a person who can manage the Roadway Data Collection, Roadway Information Management System, Data Visualization, and Travel Demand Forecasting efforts for the State of Tennessee in the Long Range Planning Division at TDOT. Primary duties include:

- Oversight of roadway data collection processes
- Enhancement of data collection methodologies
- Improvement of TRIMS/E-TRIMS
- Improvement of traffic count activities
- Highway Performance Monitoring System (HPMS)
- Data visualization activities
- Travel demand modeling and forecasting activities
- QA/QC with peer reviews across the country

This position requires a high level of managerial experience as well as passionate interests in improvement of the current systems in practice at TDOT.

Fosters a working environment in which teamwork and excellence is promoted, expected and is routinely provided. Develops and implements long and short term plans, goals, and objectives for the office; evaluates efficiency and effectiveness of office operations, methods and use of resources; implements improvements as needed.

Maintains a comprehensive, current knowledge of applicable policies, procedures, programs, codes, regulations and standards; conducts research and maintains an awareness of new issues, methods, equipment, trends and advances in the profession; reads professional literature to stay up to date with best practices; maintains professional affiliations; participates in continuing education activities; attends meetings, conferences, workshops and training sessions as appropriate.

Attends meetings, serves on committees, and makes presentations as needed; participates on review committees, policy committees, or other committees; represents the department at public meetings and statewide events.
