INSPECTION PROCEDURES
What Initiated the Call-out Inspection?
[ ] BridgeWatch Alert
[ ] TDOT District or Local Maintenance Personnel
[ ] THP or Local Law Enforcement Personnel
[ ] Other: ________________________________

Things to check on a bridge during floods:
[ ] - Span movement - horizontally as well as vertically
  1. Check displacement / deflection along curb line, both bridge rails and outer edge of bridge deck.
  2. Check for plumb of piers or bents.
[ ] - Check for embankment erosion
[ ] - Check for drift build-up on piers or bents
[ ] - Check pier exposure, if possible, and compare to previous inspection
[ ] - Review the latest bridge inspection report versus current field conditions

If Closure is recommended:
[ ] - Stay at bridge with vehicle pulled across road until bridge is secured and properly closed by District, County or City Maintenance Personnel. Use Barricade Tape, traffic cones and/or traffic flares as temporary measures to warn motorists to stay off of the bridge until such time as the bridge may be properly closed and barricaded.
[ ] - Contact: (1) District Maintenance Supervisor (if bridge is State maintained)
  (2) City or County Highway Maintenance Official (if bridge is not State maintained)
  (3) Tennessee Highway Patrol and/or local law enforcement Officers as appropriate
  (4) TDOT Regional Bridge Engineer
[ ] - The Bridge should remain closed until the water recedes and a daylight visual inspection is made by a TDOT bridge inspection team.
The bridge inspection team will work with State District maintenance or local highway maintenance officials in establishing a detour route. Any bridge on the selected detour route shall be checked prior to signing the detour route.

The bridge can be re-opened only after a TDOT bridge inspection team checks the substructure units and they are determined to be structurally stable.
