## Things to check on a bridge during floods:

- [] Span movement horizontally as well as vertically
  - 1. Check displacement / deflection along curb line, both bridge rails and outer edge of bridge deck.
  - 2. Check for plumb of piers or bents.
- [ ] Check for embankment erosion
- [ ] Check for drift build-up on piers or bents
- [] Check pier exposure, if possible, and compare to previous inspection
- [ ] Review the latest bridge inspection report versus current field conditions

## If Closure is recommended:

- [] Stay at bridge with vehicle pulled across road until bridge is secured and properly closed by District, County or City Maintenance Personnel. Use Barricade Tape, traffic cones and/or traffic flares as temporary measures to warn motorists to stay off of the bridge until such time as the bridge may be properly closed and barricaded.
- [] Contact: (1) District Maintenance Supervisor (if bridge is State maintained)
  - (2) City or County Highway Maintenance Official (if bridge is not State maintained)
  - (3) Tennessee Highway Patrol and/or local law enforcement Officers as appropriate
  - (4) TDOT Regional Bridge Engineer
- [] The Bridge should remain closed until the water recedes and a daylight visual inspection is made by a TDOT bridge inspection team.
