Across the top

Use to zoom in and out of the map. The mouse scroll bar will also work to zoom in and out of the map.

Use to reset map and show statewide view.

Use to zoom to your current location. Note: You must give the app permission to use your location information.

Find address or place — Use to type in a known address of interest, the map will zoom to that location.

Use to change the map's basemap.

Traffic History

Along the side

Filter Data: Use to filter traffic stations by county or by station number (or both). Here, you can also search 2017 AADTs greater than a number you specify.
Legend: Here you can turn layers on or off, change the order, open attribute table.
Download: Use to download the entire dataset. It can be downloaded in several forms: Data Table (CSV), Shapefile, Geodatabase, KMZ or in a table of Traffic Counts by Year. Filtered data can be downloaded in a CSV from the table.

Use to open tab with filter and layer list.

Use to close tab.

Along the bottom

Use to open the attribute table.

Options — Under Options, you can filter data and export it to a CSV.
