<b>REMARKS:</b>	<p>Philip,</p> <p>I am attaching a link for the videos of the 78x48 RCP near Woodlawn that we discussed yesterday (Priority C area). After reviewing the video, I wondered if you still would want the additional survey to plot the points. The pipe is heavily silted in and there is quite a lot of water flowing in the pipe. There are inverts labeled in the original survey.</p> <p>Please take a look at the video and let me know what you would like to do. If this is not necessary I would not want to take time away from collecting data in the other areas.</p> <p>Thanks.</p>
