# **Project Location**

------End Section------

# **Reevaluation Information**

## **Reason for Reevaluation**

| ☐ It has been more than three years since approval of the previous environmental documentation. |
|---|
| Changes to applicable laws, regulations, and procedures.  |
|   |
| Changes to the project location or existing conditions.   |
| Record of continuing project development and activity.  |

#### **Previous Documentation**

| Document Type                      | Approval Date | Type of Plans                    | Date of Plans |
|------------------------------------|---------------|----------------------------------|---------------|
| Programmatic Categorical Exclusion | 08/24/2018    | Transportation Investment Report | 04/02/2018    |

# **Reevaluation Emphasis**

Is this reevaluation focusing on a specific portion of the original project?

No

# **Project Overview**

#### Introduction

The Tennessee Department of Transportation (TDOT), in cooperation with the Federal Highway Administration (FHWA), proposes to replace the SR-1 Bridge over Muddy Creek at LM 2.13 in Haywood County, TN.

## **Background**

This project was originally developed under PIN 124505.00. Since the approval of the Programmatic Categorical Exclusion (PCE), the PIN was changed to 128113.03. The PCE was approved on 08/24/2018 based on a Transportation Investment Report (TIR) dated 04/02/2018.

The environmental effects of the proposed project have been re-evaluated based on Preliminary Plans dated 06/12/2019 in order to document revisions in Right-of-Way (ROW) acquisition, which has increased from approximately 0.34 acres to 1.47 acres. Through coordination with the FHWA Tennessee Division Office, it was determined that the increase in ROW acquisition would not require a change in document level.

# **Existing Conditions**

| Have there been any changes to the existing conditions? |  |  |  |  |
|---|--|--|--|--|
|   |  |  |  |  |
| End Section   |  |  |  |  |

# **Project Development**

#### **Purpose**

Have there been any changes to the goals and purpose of the project?

No

#### Need

Have there been any changes to the conditions or issues the project is intending to address?

No

# **Range of Alternatives**

Have any new build design alternatives been developed for this project?

No

#### **Public Involvement**

Has there been any public involvement since the approval of the previous documentation?

No

-----End Section-----

# **Project Design**

#### **Existing Layout**

Have there been any changes to the existing layout?

No

#### **Proposed Layout**

Have there been any changes to the proposed layout?

No

## **Typical Section**

#### Have there been any changes to the typical section?

Yes

The typical section described in the PCE, approved on 08/24/2018, describes the proposed typical section as consisting of two 12-foot travel lanes with eight-foot shoulders. The Preliminary Plans dated 06/12/2019 depicts the structure as consisting of two 12-foot travel lanes with six-foot shoulders.

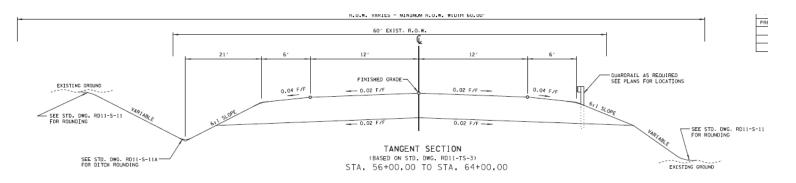

Figure 1. Tangent section of the bridge over Muddy Creek, Preliminary Plans dated 06/12/2019

## Scope of Work

#### Have there been any changes to the scope of work?

Yes

The scope of work described in the PCE, approved on 08/24/2018, describes the proposed structure as a 70-foot long, two-span prestressed box beam structure. The Preliminary Plans, dated 06/12/2019, shows the proposed structure as a 70-foot single span bridge.

## **Right-of-Way**

Have there been changes to the amount of right-of-way or easements required for the project?

Yes

|           | Right-of-Way (ROW) Acquisition Table |                    |                 |       |      |  |  |  |  |  |
|-----------|--------------------------------------|--------------------|-----------------|-------|------|--|--|--|--|--|
|           | Perm                                 | anent              | Ter             |       |      |  |  |  |  |  |
|           | ROW Acquisition                      | Drainage Easements | Slope Easements | Total |      |  |  |  |  |  |
| Previous: | 0.34                                 | 0                  | 0               | 0     | 0.34 |  |  |  |  |  |
| Current:  | 1.47                                 | 0                  | 0               | 0     | 1.47 |  |  |  |  |  |

<sup>\*</sup>Totals are calculated in acreage

## **Relocations and Displacements**

Have there been any changes to the amount of displacements and relocations?

No

Through coordination with the FHWA Tennessee Division Office, it was determined that the removal of the vacant structure on Tract 5, if needed, would not result in a displacement.

#### **Access Control**

Have there been any changes that impact access to adjacent parcels?

No

#### **Traffic Control**

Have there been any changes to traffic control measures, detours or closures?

Yes

The approved PCE documented an official detour route of approximately 26.8 miles, which exceeded the 25-mile threshold for rural detour routes prompting FHWA coordination. Since a local detour route of 21 miles was also proposed, it was determined at that time that the document could be processed as a PCE.

Since the approval of the PCE, traffic control measures have changed. One lane of traffic will be maintained during construction with a traffic signal. Based on coordination with the TDOT Design Build Team, a closure will be not allowed for this project.

#### **Environmental Studies**

Does the project require any additional environmental studies at this time?

Yes

------End Section------

# **Environmental Studies**

#### **Water Resources**

Have there been any changes that impact any streams, wetlands, or rivers in the project area?

Yes

| Labels | Type *     | Function  | 0!!      | Impacts ** |           |          |  |
|--------|------------|---|----------|------------|-----------|----------|--|
| Labels | Type       | Function  | Quality  | Permanent  | Temporary | Total    |  |
|        |            |   | Wetlands |            |           |          |  |
| WTL-1  | Depression | Water<br>Retention                              | Low      | 0.01 ac.   |           | 0.01 ac. |  |
| WTL-2  | Slope      | Wilfelife<br>habitat,<br>Nutrient<br>rentention | Medium   | 0.30 ac.   | 0.10 ac.  | 0.40 ac. |  |
|        |            |   |          | •          | Total     | 0.41 ac. |  |

| Labala        | T1100 *   | Function         | Quality                   |           |           |        |  |
|---------------|-----------|------------------|---------------------------|-----------|-----------|--------|--|
| Labels Type * |           | Function Quality |                           | Permanent | Temporary | Total  |  |
|               |           |                  | Streams                   |           |           |        |  |
| STR-1         | Perennial |                  | Undetermined at this time | 125 ft    |           | 125 ft |  |
|               |           |                  |                           |           | Total     | 125 ft |  |

<sup>\*</sup> Identification of features has not been reviewed by regulatory agencies and determinations of stream type could possibly be changed.

Coordination with the TDOT Ecology Section dated 08/16/2019, located in the Technical Appendices, states, "Based on the plans dated 6/13/2019, an update to the previous environmental boundaries report was necessary. This update, dated 8/16/2019, consisted of one additional wetland with impacts estimated to be less than 0.5 acres. The total number of features present now are one stream and two wetlands. No federally endangered or threatened species are expected to be impacted by the project."

Are there any potential impacts to water resources or natural habitat as a result of this project?

Yes

Mitigation of impacts to water resources or natural habitat will be accomplished through avoidance and minimization of potential impacts during project design such as realignment and special design, construction features or other measures. Permanent impacts will be mitigated through compensatory mitigation alternatives, improvements to existing water resources and natural habitat, or mitigation banking.

## **Navigable Waterways**

Have there been any changes that impact a navigable waterway?

No

<sup>\*\*</sup> Estimated impacts are considered "Preliminary" and will not be completely accurate until the time of Permit Application.

#### **Protected Species**

Have there been any changes that affect protected species?

Yes

| Rare Species List                                    |        |  |                |  |  |  |  |
|--|--------|--|----------------|--|--|--|--|
| Species Name   | Status | Species Potential within Right-of-Way    | Accommodations |  |  |  |  |
| Prairie False-Foxglove, <i>Agalinis</i> heterophylla | State  | Low Potential: Not observed during visit | BMP's          |  |  |  |  |
| Reniform Sedge, Carex reniformis                     | State  | Low Potential: Not observed during visit | BMP's          |  |  |  |  |

The PCE approved on 08/24/2018 listed no rare species within a one-mile radius of the project and one rare species, the Reniform Sedge, within a one-to-four mile radius of the project. A search of the TDEC Natural Heritage Inventory Program's rare species database on 07/25/2019 listed the Prairie False-foxglove within a one-mile radius of the project and the Reniform Sedge within the one-to-four mile radius of the project.

## Floodplain Management

Have there been any changes to the floodplain location or potential floodplain impacts?

No

#### **Air Quality**

Have there been any changes that impact the previous air quality determinations?

No

#### Noise

Have there been any changes that impact the noise type or require additional noise studies?

No

#### **Farmland**

Have there been any changes that affect farmland?

No

## Section 4(f)

Have there been changes that involve property protected by Section 4(f) (49 USC 303)?

No

## Section 6(f)

Have there been changes that involve property purchased with assistance from the L&WCF?

No

#### **Cultural Resources**

Have there been any changes that affect cultural resources?

No

#### **Native American Consultation**

| Have there been any changes that require Native American consu | Itation? |

## **Multimodal Transportation**

Coordination with TDOT's Multimodal Transportation Resources Division dated 06/19/2019 states, "This project accommodates bicycle and pedestrian traffic with a 6' shoulder in a rural area."

# Conclusion

#### **Determination**

#### Does the original document designation remain valid for this project?

Yes

Digitally signed by Payton

**Designation:** Programmatic Categorical Exclusion

This federal-aid highway project qualifies for a Categorical Exclusion under 23 C.F.R 771.117(d) and does not exceed the thresholds listed in Section IV(A)(1)(b) of the 2015 Programmatic Agreement between the Federal Highway Administration, Tennessee Division and the Tennessee Department of Transportation. The Department has determined that the specific conditions and criteria for these CE's are satisfied and that significant environmental impacts will not result from this action. This project is therefore designated as a Programmatic Categorical Exclusion and does not require Administration approval.

#### Supporting Material

All source material and supporting information is included in the attachments and technical appendices. The attachments are located at the end of the environmental document and include information on funding, agency coordination, and memoranda. The technical appendices are compiled as a separate document and include the project plans, technical study reports and other information.

#### Certification

By signing below, you certify that this document has been prepared in compliance with all applicable environmental laws, regulations and procedures. You can attest to the document's quality, accuracy, and completeness, and that all source material has been verified, compiled and included in the attachments and technical appendices.
