GOVERNOR

**MEMORANDUM**

**TO: Joe Deering, Region 2 Director**

**FROM: Eric Sloan, Transportation Project Specialist Sr. State Innovative Delivery**

**DATE: May 9, 2022**

**SUBJECT: PIN 114174.01 BOX CULVERT OWNERSHIP AND REPAIR LOCATIONS**

---

The most recent cursory inspection of the two-barrel box culvert (Federal ID: 33I00240075) located on the subject project, Modification of I-75 Interchange at I-24 Phase II, shows several minor spalls throughout the TDOT owned section of the box culvert and one large spall. It has been recommended to address these spall areas as part this project. Due to this recommendation and since new drainage structures will be tied to the box culvert, this scope is planned to be incorporated into the project.

There is clear delineation between the TDOT owned section and privately own section concerning the repair locations, see Exhibit A. Additionally, there is a construction joint in both box culvert barrels where box culvert transitions to the privately owned section.
