TENNESSEE DEPARTMENT OF TRANSPORTATION
TRAFFIC DESIGN MANUAL

TABLE OF CONTENTS

	<u>Page</u>
CHAPTER 1 - INTRODUCTION	
Section 1.0 About this Manual.....	1-1
Section 1.1 Traffic Control Devices.....	1-2
Subsection 1.1.1 Traffic Signs.....	1-2
Subsection 1.1.2 Markings.....	1-2
Subsection 1.1.3 Traffic Signals.....	1-2
Section 1.2 Design of Traffic Control Devices.....	1-2
Section 1.3 TDOT Traffic Design Section.....	1-3
Section 1.4 TDOT Information.....	1-3
Section 1.5 Governing Laws, Rules and Regulations.....	1-3
 CHAPTER 2 – TDOT PROJECT DEVELOPMENT	
Section 2.0 Schedule.....	2-1
Section 2.1 Three Party Plans Development.....	2-1
Subsection 2.1.1 TDOT.....	2-1
Subsection 2.1.2 Local Agency.....	2-1
Subsection 2.1.3 Design Engineer.....	2-1
Section 2.2 Plan Development Stages.....	2-1
Section 2.3 Support Projects.....	2-3
Section 2.4 Conformance to TDOT Plans Format.....	2-3
Subsection 2.4.1 Sheet Numbering.....	2-3
Subsection 2.4.2 Plans Scale.....	2-4
Subsection 2.4.3 Aerial Photography.....	2-4
Subsection 2.4.4 Details.....	2-4
Subsection 2.4.5 Notes.....	2-4
Subsection 2.4.6 Quantities.....	2-4

CHAPTER 3 – NEED FOR TRAFFIC SIGNALS

Section 3.0	Highway Traffic Signals.....	3-1
Section 3.1	Cooperation with Local Agencies.....	3-1
Subsection 3.1.1	Authorization of Installation of Traffic Signals.....	3-2
Subsection 3.1.2	Environmental Requirements.....	3-3
Subsection 3.1.3	Erosion Control.....	3-3
Section 3.2	Justification of Signal Control.....	3-4
Subsection 3.2.1	Traffic Signal Study Advance Engineering Data.....	3-4
Subsection 3.2.2	Traffic Signal Warrants.....	3-5
Subsection 3.2.3	Right Turn Volume Considerations.....	3-8
Subsection 3.2.4	TDOT Signal Justification Guidelines.....	3-9
Section 3.3	Removal of Traffic Signals.....	3-10

CHAPTER 4 – TRAFFIC SIGNAL DESIGN

Section 4.0	General.....	4-1
Section 4.1	Traffic Signal Design.....	4-2
Subsection 4.1.1	Intersection Geometrics.....	4-2
Subsection 4.1.2	Traffic Signal Movements.....	4-3
Subsection 4.1.3	Traffic Signal Mode of Operation.....	4-3
Subsection 4.1.4	Pre-Timed (Fixed Time) Operation.....	4-3
Subsection 4.1.5	Traffic Actuated Operation.....	4-5
Subsection 4.1.6	Fully Actuated Operation.....	4-5
Subsection 4.1.7	Semi-Actuated Operation.....	4-7
Subsection 4.1.8	Mode During System Operation.....	4-8
Subsection 4.1.9	Dual Ring Controller Operation.....	4-8
Section 4.2	Traffic Signal Intervals (Phases).....	4-10
Subsection 4.2.1	Need for Left Turn Protection.....	4-10
Subsection 4.2.2	Left Turn Phase Warrants.....	4-10
Subsection 4.2.3	Types of Left Turn Phasing.....	4-11
Subsection 4.2.4	Sequence of Left Turn Phasing.....	4-15
Subsection 4.2.5	Left Turn “Yellow Trap”.....	4-20
Subsection 4.2.6	Right Turn Indication.....	4-21

Subsection 4.2.7	Phase Numbering Convention.....	4-21
Section 4.3	Vehicle Detection.....	4-25
Subsection 4.3.1	Locking vs. Non-Locking Memory	4-25
Subsection 4.3.2	Detection for Different Approach Speeds	4-27
Subsection 4.3.3	Stop Line Detection.....	4-27
Subsection 4.3.4	Advance Detection.....	4-27
Subsection 4.3.5	Methods of Detection.....	4-27
Subsection 4.3.6	Inductive Loop Detection.	4-31
Subsection 4.3.7	Microwave Detection.....	4-34
Subsection 4.3.8	Video Detection.....	4-34
Subsection 4.3.9	Phase Recalls.....	4-37
Section 4.4	Pedestrian Signal Interval.....	4-37
Subsection 4.4.1	Pedestrian Signal Warrants.....	4-37
Subsection 4.4.2	Pedestrian Interval Sequence.....	4-38
Subsection 4.4.3	Countdown Pedestrian Signals.....	4-38
Subsection 4.4.4	Pedestrian Actuation.....	4-40
Subsection 4.4.5	Accessible Pedestrian Signals.....	4-42
Section 4.5	Traffic Signal Timing.....	4-45
Subsection 4.5.1	Type of Signal Timing Data.....	4-45
Subsection 4.5.2	Preset Timing Intervals.....	4-45
Subsection 4.5.3	Pre-Timed Timing Intervals.....	4-45
Subsection 4.5.4	Basic Actuated Timing Intervals.....	4-48
Subsection 4.5.5	Volume Density Timing Intervals.....	4-51
Subsection 4.5.6	Vehicle Clearance Intervals.....	4-58
Subsection 4.5.7	Pedestrian Phase Timing.....	4-60
Subsection 4.5.8	Traffic Signal Timing Plans.....	4-61
Section 4.6	Traffic Signal Coordination.....	4-63
Subsection 4.6.1	Time Base Coordination.....	4-63
Subsection 4.6.2	Closed Loop Signal System.....	4-64
Subsection 4.6.3	Methods of Communication	4-64
Subsection 4.6.4	Hard Wire Interconnect Installation.....	4-65
Subsection 4.6.5	Coordinated Timing Plans.....	4-65
Subsection 4.6.6	Offsets.....	4-66

Section 4.7	Preemption and Priority Control of Traffic Signals.....	4-66
Subsection 4.7.1	Emergency Vehicle Preemption.....	4-67
Subsection 4.7.2	Preemption Justification.....	4-67
Subsection 4.7.3	Preemption Sequence.....	4-69
Subsection 4.7.4	Multiple Preemption.....	4-69
Subsection 4.7.5	Methods of Emergency Vehicle Preemption.....	4-69
Subsection 4.7.6	System Components for Optical and Siren Activated Preemption.....	4-70
Subsection 4.7.7	Priority Control.....	4-70
Section 4.8	Railroad Preemption.....	4-70
Subsection 4.8.1	Railroad Preemption Warrant.....	4-72
Subsection 4.8.2	Pre-Signals.....	4-73
Subsection 4.8.3	Railroad Preemption Sequence.....	4-73
Subsection 4.8.4	Railroad Preemption Warning Timing.....	4-76
Subsection 4.8.5	Blank Out Signs.....	4-76
Section 4.9	Traffic Signal Heads.....	4-78
Subsection 4.9.1	Lens Size and Type.....	4-78
Subsection 4.9.2	Signal Housing.....	4-78
Subsection 4.9.3	Backplates.....	4-78
Subsection 4.9.4	Number of Signal Faces.....	4-78
Subsection 4.9.5	Positioning Relative to the Stop Line.....	4-80
Subsection 4.9.6	Horizontal Placement.....	4-80
Subsection 4.9.7	Vertical Placement.....	4-80
Subsection 4.9.8	Face Arrangement.....	4-80
Subsection 4.9.9	Left Turn Signals.....	4-85
Subsection 4.9.10	Right Turn Signals.....	4-85
Subsection 4.9.11	Pedestrian Signal Indications.....	4-85
Subsection 4.9.12	Signal Head Shielding.....	4-87
Subsection 4.9.13	Programmable Signal Heads.....	4-87
Section 4.10	Signal Controllers and Cabinets.....	4-87
Subsection 4.10.1	Traffic Signal Controllers.....	4-87
Subsection 4.10.2	Controller Cabinets.....	4-88
Subsection 4.10.3	Power Supply.....	4-88
Section 4.11	Traffic Signal Supports.....	4-89

Subsection 4.11.1	Selection of Support Type.....	4-89
Subsection 4.11.2	Strain Poles.....	4-92
Subsection 4.11.3	Mast Arm Poles.....	4-96
Section 4.12	Signal Wiring.....	4-98
Subsection 4.12.1	Signal Control Cable.....	4-98
Subsection 4.12.2	Copper Communications Cable.....	4-98
Subsection 4.12.3	Fiber Optic Communications Cable.....	4-98
Subsection 4.12.4	Inductive Loop Wire.....	4-98
Subsection 4.12.5	Loop Detector Lead-In (Shielded Cable).....	4-98
Subsection 4.12.6	Preformed Loop Detector Wire.....	4-99
Subsection 4.12.7	Cable Lashing.....	4-99
Subsection 4.12.8	Cable Sizing for Conduit.....	4-99
Section 4.13	Conduit.....	4-99
Subsection 4.13.1	Conduit Material Type.....	4-99
Subsection 4.13.2	Conduit Installation Methods.....	4-102
Subsection 4.13.3	Depth Installed (Underground).....	4-102
Subsection 4.13.4	Conduit Sizing.....	4-102
Subsection 4.13.5	Communications Cable Conduit.....	4-102
Subsection 4.13.6	Power Cable Conduit.....	4-103
Subsection 4.13.7	Bored and Jacked Conduit.....	4-103
Subsection 4.13.8	Conduit Radii.....	4-103
Subsection 4.13.9	Spare Conduit.....	4-103
Subsection 4.13.10	Conduit for Road Widening Projects.....	4-103
Section 4.14	Pull Boxes.....	4-103
Subsection 4.14.1	Purpose.....	4-103
Subsection 4.14.2	Type/Size/Use.....	4-103
Subsection 4.14.3	Spacing.....	4-103
Subsection 4.14.4	Material.....	4-103
Section 4.15	Street Lighting on Signal Supports at Intersections.....	4-105
Subsection 4.15.1	Justification.....	4-105
Subsection 4.15.2	Design.....	4-105
Subsection 4.15.3	Mounting Height.....	4-105
Subsection 4.15.4	Wiring Requirements.....	4-105

Section 4.16 Flashing Operations.....	4-106
Subsection 4.16.1 Types of Flashing Operation.....	4-106
Subsection 4.16.2 Signal Display.....	4-106
Subsection 4.16.3 Dimming LED Signal Indications.....	4-107
Section 4.17 Stop Signs at Signalized Intersections.....	4-107
Section 4.18 Signal Control for Driveways within Signalized Intersections..	4-107
Section 4.19 New Traffic Signal Inspection.....	4-108
Section 4.20 Traffic Signal Activation Procedures.....	4-109
Subsection 4.20.1 Advance Flash Period.....	4-109
Subsection 4.20.2 Publicity.....	4-109
Subsection 4.20.3 Activation.....	4-109
Subsection 4.20.4 Technical Support.....	4-109
Subsection 4.20.5 Signing Adjustments.....	4-109
Subsection 4.20.6 Police Assistance.....	4-109
Subsection 4.20.7 School Crossing.....	4-109
Subsection 4.20.8 Fine Tuning.....	4-109

CHAPTER 5 – OTHER TYPES OF TRAFFIC SIGNALS

Section 5.0 Highway Traffic Signals.....	5-1
Section 5.1 Emergency Vehicle Traffic Signals.....	5-1
Subsection 5.1.1 Displays.....	5-1
Subsection 5.1.2 Control.....	5-3
Subsection 5.1.3 Signing.....	5-3
Section 5.2 Flashing Beacons.....	5-3
Subsection 5.2.1 Intersection Control Beacons.....	5-3
Subsection 5.2.2 Speed Limit Sign Beacons.....	5-5
Subsection 5.2.3 School Zone Speed Limit Beacons.....	5-5
Subsection 5.2.4 Stop Beacons (Red).....	5-5
Subsection 5.2.5 Warning Beacons (Yellow).....	5-7
Subsection 5.2.6 Signal Ahead Beacons.....	5-7

CHAPTER 6 – SIGNING AND PAVEMENT MARKINGS

6.0 GENERAL	6-1
-------------------	-----

6.1 SIGNING	6-1
Subsection 6.1.1 MUTCD	6-2
Subsection 6.1.2 Application	6-2
Subsection 6.1.3 Sign Layouts	6-2
Subsection 6.1.4 Conventional Highways Signs	6-2
Subsection 6.1.4.1 Directional and Route Signing at Intersections	6-2
Subsection 6.1.4.2 One-Way & Wrong-Way Sign at Median Crossovers ..	6-9
Subsection 6.1.4.3 Roadside Sign Supports	6-20
Subsection 6.1.4.4 Strain Poles	6-20
Subsection 6.1.5 Freeway and Expressway (Access Controlled) Signs..	6-35
Subsection 6.1.5.1 Overhead Signing	6-35
Subsection 6.1.5.2 Structural Support Foundations	6-37
Subsection 6.1.5.3 Roadside Supports	6-37
Subsection 6.1.6 Sign Vertical Clearances	6-37
Subsection 6.1.7 Traffic Signal Signs	6-40
Subsection 6.1.7.1 Span Wire/Mast Arm Mounted	6-40
Subsection 6.1.7.2 Ground Mounted Signs	6-43
Subsection 6.1.8 Other Traffic Control Signs	6-44
Subsection 6.1.8.1 SPEED LIMIT Signs (R-2 series)	6-44
Subsection 6.1.8.2 Two-Way Left-Turn Lane Signs (R3-9 series)	6-44
Subsection 6.1.8.3 School Signs	6-44
6.2 PAVEMENT MARKINGS	6-45
Subsection 6.2.1 Stop Lines	6-45
Subsection 6.2.1.1 Guidance	6-45
Subsection 6.2.1.2 Placement	6-45
Subsection 6.2.2 Yield Lines	6-48
Subsection 6.2.2.1 Guidance	6-48
Subsection 6.2.2.2 Placement	6-48
Subsection 6.2.3 Crosswalks	6-49
Subsection 6.2.3.1 Guidance	6-49
Subsection 6.2.3.2 Placement	6-49
Subsection 6.2.4 Arrows.....	6-50

Subsection 6.2.5	Materials.....	6-50
------------------	----------------	------

CHAPTER 7 – ROADWAY LIGHTING

Section 7.0	General.....	7-1
Subsection 7.0.1	Need for Engineering Expertise.....	7-1
Subsection 7.0.2	Priorities and Funding Guidelines.....	7-3
Section 7.1	Analyzing Highway Lighting Needs.....	7-4
Subsection 7.1.1	Freeways.....	7-4
Subsection 7.1.2	Streets and Highways Other Than Freeways.....	7-8
Subsection 7.1.3	Other Locations.....	7-14
Section 7.2	Lighting Projects New.....	7-16
Subsection 7.2.1	Lighting Design Process Flow Chart.....	7-16
Subsection 7.2.2	Design Process.....	7-17
Subsection 7.2.3	Design Considerations.....	7-19
Subsection 7.2.4	Determine Classifications.....	7-19
Subsection 7.2.5	Other Design Considerations.....	7-32
Subsection 7.2.6	Roadside Safety Considerations.....	7-32
Section 7.3	Lighting Design.....	7-35
Subsection 7.3.1	Methodologies.....	7-36
Subsection 7.3.2	Computerized Design.....	7-41
Subsection 7.3.3	Electrical Design.....	7-41
Subsection 7.3.4	Foundation, Pole Mounting, and Structural.....	7-46
Subsection 7.3.5	TDOT Foundation Design.....	7-47
Subsection 7.3.6	High-Mast Lighting Design.....	7-49
Subsection 7.3.7	Underpass Lighting.....	7-50
Subsection 7.3.8	TDOT Bridge Lighting Plan.....	7-51
Section 7.4	Materials And Equipment.....	7-57
Subsection 7.4.1	Foundations and Mounting.....	7-58
Subsection 7.4.2	Pole Bases.....	7-58
Subsection 7.4.3	Poles.....	7-59
Subsection 7.4.4	Luminaires.....	7-59
Subsection 7.4.5	Other Materials and Equipment.....	7-61
Section 7.5	TDOT Lighting Plans Layouts.....	7-61

Subsection 7.5.1	Photometric/Preliminary Plans Preparation.....	7-63
Subsection 7.5.2	Photometric/Preliminary Plan Review.....	7-63
Subsection 7.5.3	Lighting CADD Standards.....	7-64
Subsection 7.5.4	Site Visits and Field Review.....	7-65
Subsection 7.5.5	Lighting Design Checklist.....	7-66
Subsection 7.5.6	Photometric Plans and Work Files Submittal.....	7-75
CHAPTER 8 – INTELLIGENT TRANSPORTATION SYSTEMS		
Section 8.0	Introduction	8-1
Section 8.1	CFR 940 Compliance.....	8-2
Subsection 8.1.1	Introduction and Scope	8-2
Subsection 8.1.2	General Criteria.....	8-2
Subsection 8.1.3	High Risk ITS Projects.....	8-3
Subsection 8.1.4	Low Risk ITS Projects	8-4
Subsection 8.1.5	Exempt ITS Projects.....	8-5
Section 8.2	Architecture	8-7
Subsection 8.2.1	General.....	8-7
Subsection 8.2.2	Architecture Conformity.....	8-7
Subsection 8.2.3	Project Level ITS Architecture.....	8-7
Subsection 8.2.3.1	For Projects Where a Regional or Statewide ITS Architecture Exists.....	8-8
Subsection 8.2.4	Interfacing with Planning and the ITS Architecture.....	8-8
Section 8.3	Systems Engineering Analysis (SEA)	8-10
Subsection 8.3.1	General.....	8-10
Subsection 8.3.2	Level of Documentation.....	8-12
Subsection 8.3.3	ITS Standards in the Systems Engineering Process ..	8-15
Subsection 8.3.3.1	Required Systems Engineering Analysis Documentation for Low Risk and High Risk Projects.....	8-16
Subsection 8.3.4	Additional Requirements	8-19
INDEX.....		I-1
APPENDIX		
Glossary.....		A-1

REVISION MEMORANDA

LIST OF TABLES

	<u>Page</u>
Table 1.1 Standard References.....	1-4
Table 2.1 Flow of Work and Typical Timeline.....	2-3
Table 2.2 Typical Project Plan Sheets.....	2-4
Table 4.1 Typical Uses of Locking and Non-Locking Memory.....	4-26
Table 4.2 Comparison of Vehicle Detection Technologies.....	4-30
Table 4.3 Pedestrian Signal Head and Pushbutton Needs.....	4-41
Table 4.4 Recommended Volume Density Timing Values.....	4-57
Table 4.5 Recommended Yellow Change and All Red Clearance Intervals.....	4-59
Table 4.6 Recommended Pedestrian Interval Timing Values.....	4-61
Table 4.7 Typical Wire Sizes.....	4-101
Table 6-1 Post Selection for Various Sign Assemblies	6-21
Table 6-2 Estimating Weight of Supports	6-33
Table 6-3 Support Selection for Typical Access-Control Roadside Signs	6-37
Table 7.1 Pavement Classification.....	7-22
Table 7.2 Typical TDOT Highway Lighting Design Parameters.....	7-35
Table 7.3 TDOT Illuminance Design Criteria.....	7-39
Table 7.4 TDOT Luminance Design Criteria	7-40
Table 7.5 Lamp Amperes (HPS Mag Reg Ballast).....	7-44
Table 7.6 Conductor Properties.....	7-45
Table 8.1 Risk Assessment for ITS Projects.....	8-6

LIST OF FIGURES

Figure 3.1 Condition Diagram.....	3-5
Figure 3.2 Collision Diagram.....	3-6
Figure 4.1 Basic Four Phase Pre-Timed Operation.....	4-4
Figure 4.2 Basic Four Phase Fully-Actuated Operation.....	4-6
Figure 4.3 Dual Ring Actuated Phasing Sequence.....	4-9
Figure 4.4 Turn Signal Displays.....	4-12
Figure 4.5 Left Turn Sight Distances.....	4-14

Figure 4.6	Typical Permitted Left Turn Sequencing.....	4-16
Figure 4.7	Typical Protected Left Turn Sequencing.....	4-17
Figure 4.8	Lead-Lag Left Sequencing.....	4-19
Figure 4.9	Recommended Phase Assignments for Four-Leg Intersections.....	4-22
Figure 4.10	Recommended Phase Assignments for T-Intersections.....	4-24
Figure 4.11	Typical Detection Zones.....	4-28
Figure 4.12	Advance Detector Placement.....	4-29
Figure 4.13	Typical Loop Detector Installation Layout.....	4-32
Figure 4.14	Preformed Inductive Loop.....	4-33
Figure 4.15	Microwave Detection (Side-Fired Radar).....	4-35
Figure 4.16	Video Detection.....	4-36
Figure 4.17	Pedestrian Interval Signs and Signals.....	4-39
Figure 4.18	Accessible Pedestrian Signal Pushbutton Locations.....	4-44
Figure 4.19	Actuated Phase Intervals.....	4-50
Figure 4.20	Volume Density Timing Variable Initial Interval.....	4-53
Figure 4.21	Volume Density Timing Gap Reduction Feature.....	4-55
Figure 4.22	Vehicle/Pedestrian Interval Timing Relationship.....	4-62
Figure 4.23	Emergency Vehicle Preemption Sequence.....	4-68
Figure 4.24	Emergency Vehicle Preemption Example.....	4-71
Figure 4.25	Railroad Preemption Sequence (2 and 3 Phase Operation).....	4-74
Figure 4.26	Railroad Preemption Sequence (8 Phase Operation).....	4-75
Figure 4.27	Railroad Preemption Example.....	4-77
Figure 4.28	Horizontal and Vertical Locations of Overhead Signal Heads).....	4-79
Figure 4.29	Signal Head Placement (No Left Turn Lanes).....	4-81
