

Work Zone Safety and Mobility Manual

February 2017

INTRODUCTION

In September 2004, the Federal Highway Administration (FHWA) published updates to the work zone regulations at [23 CFR 630, Subpart J](#). This updated rule, referred to as the Work Zone Safety and Mobility Rule, applies to all state and local governments on projects that receive federal-aid highway funding. Transportation agencies were required to comply with the provisions of the Rule by October 12, 2007. The changes made to the regulations broaden the former Rule to better address the work zone issues of today and the future. On December 5, 2007, the FHWA added the new Subpart K to [23 CFR 630](#) to supplement the other regulations that govern work zone safety and mobility. The effective date of this regulation was December 4, 2008.

TDOT Work Zone Safety and Mobility Manual is approved.
