

## Who we are:

Transportation is so basic that many of us overlook its overwhelming importance in our daily lives. Practically everything used in our homes, offices, or schools across Tennessee – from furniture to food items to clothing – requires a large and complex transportation network. The Tennessee Department of Transportation provides citizens of Tennessee and travelers with one of the best transportation systems in the country. TDOT is a multimodal agency with responsibilities in building and maintaining roads, aviation, public transit, waterways, railroads, cycling and walking. Our involvement ranges from airport improvements to funding transit buses to planning for river ports. The Department of Transportation has approximately 3,500 employees with four statewide region facilities in Knoxville, Chattanooga, Nashville, and Jackson. TDOT Aeronautics is located near the John C. Tune Airport in Nashville, TN.

### Statewide Signing & Marking Transportation Engineer

Traffic Design Division – Traffic Services

Nashville, TN

\$115,008 annually

#### Job Overview

The Statewide Signing & Marking Transportation Engineer is a statewide transportation engineer position that will manage all aspects of TDOT's traffic signing and markings program within Traffic Services. This position will provide support to Project Teams directly responsible for delivering projects for all phases of the Project Delivery Network (PDN) in accordance with the project's scope, budget, and risk. These projects will range in complexity and risk from simple to exceedingly complex. The purpose of this position, which functions as a Statewide Signing & Marking Transportation Engineer, is to coordinate and oversee the development of the signing and marking program as developed by the unit and consultants to ensure uniform and comprehensible visual systems for these devices.

This position will serve as the Statewide Signing & Marking Transportation Engineer for TDOT, establish the design and standard application of signs and traffic markings, and authorize their use on state trunklines for the purpose of improving motorists' safety and operational efficiency. This work includes developing standards, reference guides, and manuals, as well as preparing correspondence, reports, programs, contracts, and work authorizations at the region and headquarters. This position must effectively articulate technical signing and traffic marking concepts through training, mentoring, and collaborating as part of a matrix organization. The Statewide Signing & Marking Transportation Engineer assists with monitoring and managing the scope, schedule, and budgets of all transportation traffic signing and marking projects and working with the Project Management Division to make the required adjustments as necessary to ensure that the work completed is in alignment with the Department's Asset Management and Strategic goals.

#### Essential Job Responsibilities

Serve on Project Teams as part of a matrix organization by providing technical expertise related to transportation traffic signing and marking elements for both stand-alone projects and in support of larger roadway design project visions for those projects having the highest complexity; adhere to traffic services-related critical goals and intended outcomes for the scope, schedule, budget, and quality in coordination with the Project Manager, applying context-sensitive design strategies; implementing innovative concepts; proactively assessing risk factors.

Ensure exceptional customer service to both internal and external customers by exercising effective listening skills, providing prompt responses, maintaining complete and accurate documentation, and communicating effectively. Remain current on national best practices related to traffic services and on the Manual on Uniform Traffic Control Devices (MUTCD) within TDOT's Traffic Design Division as it relates to transportation projects, facilities, and operations activities; serve in the role of the Statewide Signing & Marking Engineer to ensure compliance with the standards, specifications, and design of traffic control measures, assist with the development of plans, legislation, and regulations that seek to increase traffic technologies, inspire innovation, and improve mobility for TDOT employees, contractors, and the traveling public; and integrate traffic considerations and statutory and regulatory requirements into TDOT's guidance documents, processes, and procedures.

Routinely identify, document, and effectively collaborate with the Traffic Services Section acquiring knowledge that includes maximizing project successes, acknowledging national best practices, and avoiding past errors. Assist with modifications to all applicable policies, procedures, design standards, manuals, specifications, and special provisions.

Serve on selection committees for professional engineering services as part of the Brooks Act, including assistance with RFP development, attendance at project-specific marketing meetings, assistance with determining scoring criteria, assistance with project information sessions, when applicable, serving as a scorer as part of the consultant acquisition process, and attendance at de-briefs for consultants where usable feedback must be provided. Review and give final approval to consultant submittals to determine if a consultant is qualified to perform traffic signing and marking work. Review and give final approval of traffic signing and marking specifications. Review, advise and make recommendations to ensure that projects are completed on time.

Serve as the Signing and Marking Program Specialist for the department to review and give approval of the signing and marking programs, including all traffic signs and permanent and temporary markings, including signing and marking plans developed by consultants and in-house for contract letting and in support of Design's projects. Review and give final approval to design, attend meetings for plans prepared by consultants or in-house.

Provide technical expertise that ensures the contractual agreements, scope, schedule, budget, and quality of all traffic services projects support the delivery of the Department's Work Program while also ensuring compliance with Federal and State traffic design and regulations.

Assist in the development of training that addresses acquired knowledge, signing and markings objectives and technical design elements related to transportation for the purpose of improving team performance, creating a stronger understanding of the transportation industry, inspiring new ideas, and developing skills.

Maintain and update the department's signing and marking inventory system, coordinate and work collectively with the asset management division. Responsible for the maintenance and updates the department's signing and marking inventory system.

### **Qualifications**

- Bachelor's degree in engineering
- Licensed Professional Engineer (PE)
- 12 years of demonstrated competency in the subject traffic engineering field

### **Ideal Candidate**

The Statewide Signing & Marking Transportation Engineer is a proactive and driven individual who works well with diverse teams, government agencies, and contractors.
