

## **Transportation Manager 1**

### **TDOT Maintenance Division Facilities/Special Projects Office**

This position assists with project development of building facilities and special highway maintenance projects. Under general supervision, responsibilities include: 1) administer and manage contracts for various TDOT programs such as: rest areas and ferry operations, infrastructure maintenance, as well as other specialty contracts; 2) coordinate and support capital improvements projects and facility maintenance projects throughout the state; 3) supervise support staff and conduct performance reviews; 4) serve as one of TDOT's Emergency Services Coordinators during disasters or major emergencies; 5) frequent communication and interaction with multiple state agencies, Federal Highway Administration, elected officials, and general public.

The office is located at TDOT Headquarters (505 Deaderick Street) in downtown Nashville. Occasional statewide and out-of-state travel is required.

### **Preferred Qualifications:**

- B.S. degree in Civil Engineering from an accredited college or university or 5 years minimum of professional engineering related experience.
- Engineer Intern Certification or Professional Engineer License.
- Experience with project development, building construction, facility maintenance, facility management.
- Strong written and verbal communication skills.
